## GPRS Tracking

Consultant Engineers, IT and Communication Specialists

### GPRS based GPS Tracking

Radioactive Networks are pleased to offer our GPRS tracking solution. With an embedded processor, and custom software our GPRS tracking unit can operate with your needs in mind. The software can be modified to suit each customer and their particular needs.

Tracking using GPRS can be very cost-effective and is highly scalable. Very little effort is involved moving from a system tracking 2-3 vehicles to a system tracking hundreds.

### Specifications

- Selectable GPS update rates from every 5 seconds to every hour
- Automatic swapover to a backup server if the primary server fails
- Ability to send telemetry back to the server
- Will connect to OziAPRS, iServ or a clients own server software
